## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments with respect to the rejected claims have been considered but are moot in view of the new ground(s) of rejection.

### ***Allowable Subject Matter***

Claims 12-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 22-27 are allowed.

### ***Claim Rejections - 35 USC § 103***

Claims 1-11,14-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art (APA) in view of Hartzell (4666602). APA is figure 1 of this application. Damage results when foreign objects become lodged between the roll and the screen. Hartzell solves this problem by disclosing similar apparatus including the use of a spring to bias a roll against a screen; see figures 4-6. In order to prevent apparatus damage, it would have been obvious for one of ordinary skill in the art to modify APA by providing a spring biasing means for the roll, taught to be desirable by Hartzell. The remaining limitations would the have been obvious design choices only. For example, the type of spring biasing means used would have been an obvious modification to one skilled in the art once the spring of Hartzell was known.
